

GAME INSTRUCTIONS

1. Install python
2. Open your terminal and run this command “pip install pygame ” which is 10MB
3. Once that’s done, save the main.py together with the image saved as bg.jpeg in your favourite directory
4. Right click on the main.py and open it directly using python IDLE or command prompt. Or if using an IDE then do not open as project just open it and run it.
5. The game starts by opening a window where it asks the user if they want to play or not. Press Y to play or press N To watch an AI play instead
6. We record you play the game first (by pressing Y) before appreciating an AI in action (by pressing N)
